CONTENTS VOLUME 263

Y. Kanemitsu. Light emission from porous silicon and related materials — No. 1, p. 1

G.C. John, V.A. Singh. Porous silicon: theoretical studies — No. 2, p. 93

J.F. Cariñena, L.A. Ibort, G. Marmo, A. Stern. The Feynman problem and the inverse problem for Poisson dynamics — No. 3, p. 153

V. Chernyak, N. Wang, S. Mukamel. Four wave mixing and luminescence of confined excitons in molecular aggregates and nanostructures. Many-body Green function approach — Nos. 4–6, p. 213

CONTENTS VOLUMES 261, 262

M. Anselmino, A. Efremov, E. Leader. The theory and phenomenology of polarized deep inelastic scattering — 261, Nos. 1 & 2, p. 1
M. Hjorth-Jensen, T.T.S. Kuo, E. Osnes. Realistic effective interactions for nuclear systems — 261, Nos. 3 & 4, p. 125
M.A. Strauss, J.A. Willick. The density and peculiar velocity fields of nearby galaxies — 261, Nos. 5 & 6, p. 271
V. Sahni, P. Coles. Approximation methods for non-linear gravitational clustering — 262, Nos. 1 & 2, p. 1
Z. Chang. Quantum group and quantum symmetry — 262, Nos. 3 & 4, p. 137
M. Ichiyanagi. Conceptual developments of non-equilibrium statistical mechanics in the early days of Japan — 262, No. 5, p. 227
J.E. Thomas, L.J. Wang. Precision position measurement of moving atoms — 262, No. 6, p. 311
